DETAILED ACTION

1. The prior rejections under 35 USC 112 are withdrawn in view of clarifying amendment. The prior rejections under 35 USC 102(g) are withdrawn in view of amendment which has removed titanium from the scope of M.

Specification

2. The priority claim is objected to because it is split between two sentences, and is further split by the section heading SPECIFICATION on page 1. Applicant should amend the specification by canceling both the preliminary amendment to the specification (wherein priority to 07/720,282 is specified) and the first paragraph of the specification as filed (wherein priority to 07/533, 245 and 07/406,945 are specified), and then present a newly drafted sentence, including all three priority applications (including their current status as either abandoned or patented, including applicable US patent numbers), to be inserted as the first sentence following the title on page 1 of the specification.

3. The last line of each of the following pages is objected to because the print quality is poor: 4, 5, 10, 11, 12, 15, 18, 19, 21, 22, 28, 30, 31, 33, 34, 38, 40, 41, 42, 43 and 44. While sufficient for examination, the poor print quality will likely result in printing errors in any patent which may issue from this application. Correction is required. In

view of the large number of affected pages, applicant should consider filing a substitute specification.

4. The amendment filed 11/09/1992 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: the species of "an alkoxy radical" and "an alkylborido radical" as recited in the preliminary amendment to the specification at page 22, lines 13-21.

Applicant is required to cancel the new matter, or to identify where she believes support to be found in the specification as filed, in reply to this Office Action.

Double Patenting

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 27-32 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 2, 5 and 6 of U.S. Patent No. RE37,788. Although the conflicting claims are not identical, they are not patentably distinct from each other because, despite minor differences in wording and scope, essentially the same compounds are being claimed.

7. Claims 27-32 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 4, 5, 35-41, 44 and 45 of copending Application No. 07/728,428. Although the conflicting claims are not identical, they are not patentably distinct from each other because, despite minor differences in wording and scope, essentially the same compounds are being claimed.

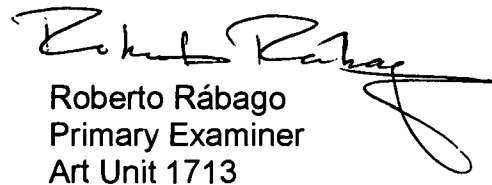

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
